About Me

Focused and detail-oriented web developer and designer passionate about creating seamless, user-centered digital experiences. I take full ownership of my projects, solving design and technical challenges with thoughtful, practical solutions. Committed to clean code and intuitive interfaces, I aim to deliver work that not only looks great but functions flawlessly. My goal is to build meaningful, accessible websites that make a positive impact and stand the test of time.

Education

- **Web Development & Web Design Course (2024-2025):** Completed a web development and design course covering HTML, CSS, JavaScript, Bootstrap, React.js, UX/UI, and Web Design. Developed skills in building responsive, user-friendly websites and applications.
- **Johanna-Wittum-Berufskolleg, Pforzheim (2024-2025):** I focused mostly on Web Development and Web Design but also learned some health-related topics on the side. It was a great mix that let me explore both areas.
- **Insel-Realschule, Pforzheim (2021-2024)**
- **Kepler-Gymnasium Pforzheim (2019-2021)**
- **Weiherbergschule, Pforzheim (2017-2019)**
- **St. Cyril and Methodius, Veles (2013-2017)**

Experience

- **Internship – Administrative Office (2022):** Supported office operations by performing tasks such as data entry, filing, and correspondence. Gained organizational and administrative experience.
- **Co-Organizer – New Year's Party (2022):** Worked together with a group of friends to plan and organize a large New Year's party. Responsibilities included coordinating

invitations, arranging decorations, and managing event activities. Developed skills in teamwork, communication, and event logistics.

- **Internship – Nursing Home (2023):** Assisted staff with daily tasks and provided support to elderly residents. Developed skills in communication, empathy, and teamwork within a healthcare environment.
- **Internship – School for Children with Special Needs (2023):** Assisted teachers in supporting children with special educational needs. Learned about adaptive communication, patience, and inclusive teaching methods.
- **Internship – Kiosk (2023):** Helped with sales, customer service, and inventory management in a busy retail kiosk.
- **Part-Time Barista (2023):** Worked part-time as a barista, gaining experience in customer service, multitasking, and teamwork in a fast-paced environment.
- **Social Media & Branding Assistant (2023):** Helped set up and optimize Instagram and TikTok accounts to promote a small business. Created content strategies and assisted with product presentation.
- **E-Commerce (Shopify Store – Reselling) (2024):** Launched a Shopify store to explore online reselling. Learned how to choose products, set up a storefront, manage listings, and understand pricing strategies. Gained practical experience in e-commerce platforms, product presentation, and customer experience.
- **Affiliate Marketing (Content-Based Promotion) (2024):** Tried affiliate marketing through social media and content promotion. Gained insight into how affiliate programs work, how to generate leads through digital content, and the challenges of building trust and driving conversions online.
- **Newspaper Distributor (2025):** Worked part-time distributing newspapers, demonstrating reliability, time management, and early-morning discipline.

Projects

- **Pyxis Company Website (Group Project):** A website created for a newly established company as part of a group project. I was responsible for the UX/UI design, as well as implementing the frontend using HTML, CSS, and WordPress. My focus was on creating a modern and user-friendly interface that clearly communicates the brand's identity and services.
- **Real Estate Website:** Created for my React.js module, this project simulates a real estate platform with dynamic property listings, filter functionality, and property detail views. It helped me get hands-on experience with React components, props, state management, and routing.
- **Hospital Website:** A responsive hospital website built as part of a Bootstrap module. This practice project includes sections like services, doctor profiles, appointment forms, and contact info. It helped me learn how to structure a clean and mobile-friendly layout using Bootstrap components.

- **Quote Generator:** A simple and interactive quote generator developed during my JavaScript module. It displays a random motivational quote with each button click. This project focused on DOM manipulation, event handling, and working with arrays in JavaScript.

Skills

- HTML, CSS, JavaScript, Responsive Design
- React, Bootstrap
- WordPress with XAMPP and Elementor
- Figma, Adobe Illustrator, Canva, Adobe Photoshop
- Search Engine Optimization (SEO), UI/UX principles
